

# UNICOAT

## Pellet binder

### COMPOSITION:

Polymethylolcarbamide 95.0% min

### INDICATION:

1. Used as a binding aid for improving water & durability.
2. Used as binding aid for reducing dust and improve hardness of poultry and cattle feed.
3. Used as a binding aid for reducing dust and improving water resistance.

### RECOMMENDED INCLUSION:

Animal feed..... 1 to 2 kg/ton

Poultry feed..... 2 to 3 kg/ton

### DIRECTION FOR USE:

Add UNICOAT Pellet Binder directly into feed mixer at recommended rate and mix completely with other ingredients then follow general pelleting and extrusion guideline. Post cooling for 24 to 72 hours can optimize the binding performance.
